1. Create a MySQL table called playlists to store Spotify-style music playlists, with columns: playlist_id (primary key), user_id (foreign key), name (varchar), and created_at (datetime). Write the CREATE TABLE statement.

```
CREATE TABLE playlists (
   playlist_id INT PRIMARY KEY AUTO_INCREMENT,
   user_id INT,
   name VARCHAR(100),
   created_at DATETIME,
   FOREIGN KEY (user_id) REFERENCES users(user_id)
);
```

playlist_id	user_id	name	created_at

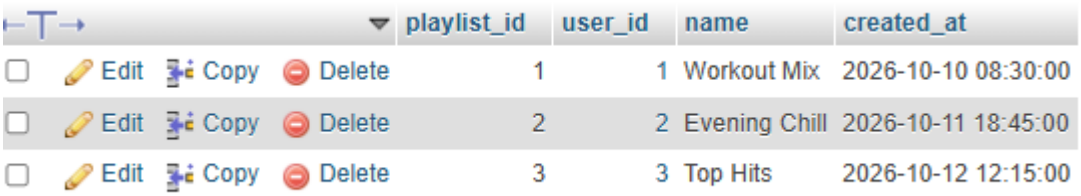

2. Insert three sample records into the playlists table: one for a user with a 'Workout Mix', one with a 'Chill Vibes', and one with a 'Top Hits' playlist. Use realistic data for each field.

```
INSERT INTO playlists (user_id, name, created_at)
VALUES
(1, 'Workout Mix', '2026-10-10 08:30:00'),
(2, 'Chill Vibes', '2026-10-11 18:45:00'),
(3, 'Top Hits', '2026-10-12 12:15:00');
```

	playlist_id	user_id	name	created_at
Edit Copy Delete	1	1	Workout Mix	2026-10-10 08:30:00
Edit Copy Delete	2	2	Chill Vibes	2026-10-11 18:45:00
Edit Copy Delete	3	3	Top Hits	2026-10-12 12:15:00

3. Write an SQL UPDATE statement to rename the 'Chill Vibes' playlist to 'Evening Chill' for a specific user_id.

```
UPDATE playlists
SET name = 'Evening Chill'
WHERE name = 'Chill Vibes'
  AND user_id = 2;
```

	playlist_id	user_id	name	created_at
Edit Copy Delete	1	1	Workout Mix	2026-10-10 08:30:00
Edit Copy Delete	2	2	Evening Chill	2026-10-11 18:45:00
Edit Copy Delete	3	3	Top Hits	2026-10-12 12:15:00

4. Write a DELETE statement to remove a playlist named 'Workout Mix' for a given user_id from the playlists table.

Hint: Make sure your WHERE clause targets only the intended row.

```
DELETE FROM playlists
WHERE name = 'Workout Mix'
  AND user_id = 1;
```

	playlist_id	user_id	name	created_at
Edit Copy Delete	2	2	Evening Chill	2026-10-11 18:45:00
Edit Copy Delete	3	3	Top Hits	2026-10-12 12:15:00

5.

```
DELIMITER //

CREATE PROCEDURE GetMonthlyPlaylistCount(
    IN p_user_id INT,
    IN p_month INT
)
BEGIN
```

```
    SELECT COUNT(*) AS total_playlists
    FROM playlists
    WHERE user_id = p_user_id
      AND MONTH(created_at) = p_month;
END //

DELIMITER ;

CALL GetMonthlyPlaylistCount1(2, 10);
```

total_playlists
1
